

NGSX

Next Generation Science Exemplar

NGSS • 3-Dimensional Learning • K-12 Educators

Professional Development Course

This dynamic course supports science teachers in three-dimensional (3D) learning that draws on the major components of the Next Generation Science Standards. NGSX is a unique professional development learning approach that combines a multi-faceted web platform with face-to-face hands-on group work.

Participating teachers will develop tools and strategies to take this new vision of science education back to their classrooms.
